

## **How to let people know that you are doing Kleeneze**

The secret to building a Kleeneze business is to let everybody you what you are doing. A lot of them will become customers and some will become distributors and join your team. It is important not to prejudge who will or who wont just contact everybody regardless. Make sure that you also use your social media, text and email to spread the word. Below are some simple one liners that you can use. You can direct them to the teams website.
